SALE INFORMATION

Inspection: Sale inspections are invited from 10.00am on sale day.

Auction: The sale will commence at 1.00pm.
Sale of rams will be conducted in an Open Cry auction.

Delivery: Delivery of rams purchased can be arranged free of charge by the Aloeburn team, if required.

GST: The sale will be conducted as GST exclusive. GST will be added to the purchase price prior to invoicing.

Payment: All purchases will be invoiced through Quality Livestock and payment to be made electronically to their nominated account details.

Health: Aloeburn Poll Merinos are brucellosis accredited – Certificate 76599 / Accreditation OB-TR / Expiry 31/5/2028
All rams have been vaccinated with Gudair at marking (prior to 8 weeks of age).
Aloeburn flock status for OJD is Approved Vaccinates.
All rams have been vaccinated with GlanEry 7:1 B12 at marking and weaning.
All rams have been vaccinated 17/7/25 with GlanEry 7:1 B12
All rams were vaccinated with Scabiguard at marking.
All rams were drenched with Triguard and Moxxi LA 7/8/25
All rams were treated with Viper 2/5/25
Aloeburn is a footrot free property.

Fertility: Rams have been inspected at classing and are guaranteed to work.

Guarantee: If in the next 6 months a ram becomes infertile or incapable of work, provided it is not from injury or disease contracted after it has left our possession, then we will offer a suitable replacement. Any claim must be accompanied by a relevant veterinary certificate.

Disclaimer: While all due care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors, the selling agents or representatives thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included.

Rebate: A rebate of 3% will be allowed to outside agents in attendance.

Catering: Please join us for a light lunch prior to the sale and for a drink afterwards.

Commercial ram buyers guide to genetic selection

What a Australian Sheep Breeding Values

Australian Sheep Breeding Values (ASBVs) can be used to compare the genetic differences between animals for a range of important traits. Performance data, pedigree, and genomic data inform an animal's ASBVs, with ASBVs also being adjusted for known non-genetic impacts on performance. ASBVs provide an indication of how an animal's progeny will perform based on the genes an animal has, allowing you to compare the genetic differences between rams, enabling for informed selection decisions. It's important to set a breeding objective prior to sale and to track your flock's performance.

What is an index

Indexes combine multiple traits (i.e., growth, reproduction, carcass, and wool) into a single value to describe an animal's economic value based on its relative importance to a specific production system. Indexes are a useful ranking tool within a catalogue, once sorted using an index it is important to look at individual ASBVs within your breeding objective. For more information on ASBVs and indexes scan the QR code.

What is a Percentile Band and how to use it

Percentile bands are used within Sheep Genetics to benchmark where an individual animal is sitting for a trait relative to industry. For the most up to date ASBVs and Percentile Bands visit the Sheep Genetics website, as they are updated every 2 weeks. On the Sheep Genetics search site, animals are highlighted based on the top 5 (purple), 10 (blue) and 20% (green) for each trait in the analyses.
